

Project Plan– Team 2

Introduction

Coffee Cart Rewards Management System for Android is a program that will track customers via their VIP card. It will allow the customer to accrue points based on the amount of money they spend and get benefits based on their points. The android app will allow a manager to add, remove and edit VIP customers in the system.

Process Description

Add VIP Customer - Adds a new VIP customer to the system

Entrance criteria: Customer's name, phone number, birth date, and assigned VIP card number.

Exit criteria: Customer is added to the system and a confirmation is displayed.

Remove VIP Customer - Removes an existing VIP customer from the system

Entrance criteria: Customer's first and last name, phone number or VIP card number.

Exit criteria: Customer is removed from system and a confirmation is displayed.

Edit VIP Customer - Edits an attribute of an existing VIP customer

Entrance criteria: Customer's first and last name, phone number or VIP card number with new value for attribute to be updated.

Exit criteria: Customer's account is updated with new value and confirmation is displayed.
