

Gold Level is calculated from VIP points and points are calculated based on 30 day purchase history and total history.

Gold Level is checked when a VIP customer asks for a refill, if VIP is not at Gold Level then VIP must make a purchase at half price.

When VIP pre-orders an item the system checks overall preOrderSlots for that PreOrderable item, which will be affected by whether or not it is a best seller, subtracted by the number of current pre-orders in the system for that day.
